Documentation Life Preserver

April 4, 2019 Part 1: 10:45-11:45 am Part 2 1:15 - 2:15 pm (0.2 CEUs)

Do you feel like you are drowning in documentation? Dan Fedor, National Director of Reimbursement US Rehab, has over 25 years of experience and through this interactive workshop he will teach attendees how to effectively and efficiently document medical necessity for mobility products known as the **Documentation LIFE Preserver**.

Daniel Fedor
National Director
of Reimbursement
US Rehab

LEARNING OBJECTIVES:

- Recognize what third party payers are looking for when reviewing mobility claims
- Identify the necessary language for a comprehensive evaluation for the purpose of third party reimbursement
- List key components of a successful wheelchair assessment to ensure your patient receives the medically necessary product in a timely manner

VGM Education is accredited by the International Association for Continuing Education and Training (IACET) and is authorized to issue the IACET CEU.

The Case for Wheels: Selecting the Clinically Appropriate Base

April 4, 2019 Part 1: 2:30-3:30 pm Part 2 3:45-4:45 pm (0.2 CEUs)

The recommendation of power wheelchair mobility can be very challenging within the Complex Rehab market these days. Jay Doherty OTR, ATP/SMS, Director of Clinical Education, has 24 years of experience working in the field of assistive technology with a concentration on complex rehab. He understands there are many different choices for the consumer to choose from and the importance of selecting the correct power base for the individual's specific needs. This course will provide an interactive lecture and hands-on component to allow the groups of participants to explore how drive wheel configuration handles different environmental challenges.

Jay Doherty
OTR, ATP/SMS
Director of Clinical
Education
Quantum Rehab

LEARNING OBJECTIVES:

- Participants will be able to list two advantages of each of the 3 main power wheelchair configurations available today.
- Participants will be able to describe two of the "outdoor terrain" behaviors of each power wheelchair, wheel configuration.
- Participants will be able to describe the effects of motor speed, torque, and turning radius and demonstrate how they affect the performance of each power wheelchair configuration

CEU/CEC Disclaimer: It is the attendees' responsibility to complete relevant documentation requirements in order to receive the qualified CEU/CEC associated with this course. Failure to complete all required documentation satisfactorily will result in an invalid certificate.

America Occupational Therapy Association (OTA) Authorized Provider #6865 (Valid through 12/31/19).
